- RESTful APIs, Web Services, and EDI Integrations
- Workflow Development and Customization
- Project Planning and Management
- Data Migration and Conversion
- Custom Report Development
- Technical Documentation and Training
- Troubleshooting and Support

## EMPLOYMENT HISTORY

---

June 2019 – Present

### **Freelance Netsuite Developer**

- Designed, developed, and deployed custom solutions for clients on the NetSuite platform
- Expert in SuiteScripting, SuiteFlow, SuiteTalk, SuiteBuilder, SuiteCloud, SuiteCommerce Advanced, Custom Records, SuiteAnalytics, SuiteCloud Plus, User Event Scripts, SuiteScript 2.0, Map/Reduce, SuiteFlow Debugger
- Implemented RESTful APIs, web services, and EDI integrations to exchange data between NetSuite and other systems such as Amazon, Wayfair, and FreightClub
- Worked on critical projects to enhance company efficiency, such as custom EDI connection with NetSuite and Amazon Direct Fulfillment
- Migrated and converted data to NetSuite from various other systems, ensuring data accuracy and integrity
- Created custom reports, objects and workflows to meet clients' business requirements

During my NetSuite development experience, I have worked on several advanced projects related to integration and cloud connectivity. These include:

- Developed custom API/EDI integrations with multiple systems, including Amazon, Wayfair, and FreightClub to exchange data between NetSuite and these systems. These integrations were designed to be scalable and reliable, ensuring data accuracy and consistency across all systems.
- Created custom bulk order printing functionality that integrates with different sources API and generates PDF files based on advanced HTML / PDF templates in NetSuite. This functionality is designed to be flexible and configurable, allowing clients to customize the PDF templates based on their specific needs.
- Worked on the integration of NetSuite with cloud platforms such as AWS, Google App Engine, and Microsoft Azure. This involved designing and implementing RESTful APIs, web services, and other integration mechanisms to exchange data between NetSuite and these cloud platforms.
- Developed custom workflows and reports to meet clients' specific business requirements. These workflows and reports were designed to improve efficiency, increase visibility into business operations, and enable better decision-making.

You can watch a presentation of my work sample related to the integration between NetSuite and FreightClub at the following YouTube video link:
